Mills County men  
Who Have Answered  
Their Country's Call

# Announcement

The management of the **Glenwood Opinion** take great pleasure in presenting this little booklet to the people of Mills county.

We have done our best to secure the name of every man who has been in the service of his country. If we have missed any we sincerely regret that we have done so. This booklet has been prepared and is issued with the idea of helping our citizens to keep in mind the names of those who have made this great sacrifice for us.

The men whose names appear here are the ones who have given up lucrative positions and have left their wives and families; their parents and have donned the khaki, pledged to fight for and if necessary to die for the principles of which we, as a nation are so proud.

Eighteen of the men who left Mills county, some of whom journeyed to foreign lands to fight for the freedom of the world, have made the supreme sacrifice. Their life's blood has mingled with that of the heroes of France, England and Italy. We cannot do too much to perpetuate the memory of these men and to keep their deeds ever green in the thoughts of our people.

The greater part of these men did not leave the confines of our own United States but they cheerfully went to the camps to prepare themselves for the part they were to play in the great struggle. The men are now returning to their homes to take up the duties where they were abandoned when the needs of our country were so great. That a permanent record of the names of these men may be kept, the management of the **Glenwood Opinion** have prepared this booklet and we present it to you with our compliments and the hope that it may be preserved.

# Chiropractic for Soldiers

Chiropractic will do its share toward helping the sick boys when they return.

Chiropractic seldom fails, never harms, is logical and will bear investigation. It is new to many, but has among its warm supporters thousands who have found relief.

Clinical records show that there is hardly a recognized form of disease that has not been successfully adjusted by this method.
